SUMMARY

Software Engineer specializing in C#/.NET backend and full-stack development (ASP.NET Core, React, TypeScript, Node.js, Flutter). At ZagTrader, built fintech trading infrastructure: SWIFT (ISO 15022) securities-settlement messaging, FIX-protocol connectivity, market-data feeds, and cryptographic licensing — using SignalR, SQL Server, and IKVM. Google-certified in IT Support and Project Management; proven in shipping scalable, production-grade systems and solving complex problems.

EDUCATION

Al Hussein Technical University (HTU)

Oct 2021-July 2025

- Bachelor in Computer Science
- GPA: Excellent

Jubilee Institute

- Organized Sports Day event as part of school leadership activities.
- Participated in Line Robotics Competition (5th place).
- Engaged in extracurricular activities including Model United Nations (MUN) and volunteering programs.

PROFESSIONAL EXPERIENCE

Software Engineer - ZagTrader

September 2025 - Present

- Built Swift Suite (Monitor, Engine, Bridge) — SWIFT MT54x settlement (C#/.NET 10)
- Engineered Swift Engine: Message Reader, Validator, Builder, Archiver (Prowide/IKVM)
- Developed Swift Bridge gateway to Fineksus, Tadawul/Edaa & SFTP; Azure Key Vault
- Created WatchList dashboard (React) with real-time SignalR market-data visualization
- Implemented ZagKeyGenWeb crypto licensing (AES/HMAC) & FixPortal FIX portal (EF Core)
- Added CMC Markets (FX) & IDC feed readers; self-contained apps via Inno Setup & batch
- Analyzed ZagTraderConnector integrations and database architecture

Flutter & Mobile Application Developer - Lightning Gate (JPECO)

July 2024 - March 2025

- Developed and maintained mobile applications using Flutter & Firebase, ensuring stability and scalability.
- Partnered with developers and designers to implement features and fix bugs, improving user experience and app reliability.

Technical Support System Controller

November 2021 - July 2024

- Managed IT systems and coordinated technical support for student events and activities.
- Led technical operations for large-scale events, including MACH1 with AreoSquad at King's Academy.

Esports Staff — Jordan Esports Federation (JEF/JEG)

July 2023 - May 2025

- Provided IT support and served as a referee during official esports tournaments.
- Ensured smooth execution of competitive events by managing technical infrastructure.

Technical Support and Web Development at HTU OLC

June 2023 - Oct 2023

- Contributed to the HTUx platform, drafting user manuals and technical documentation to streamline onboarding.
- Delivered IT support to staff, reducing issue resolution time and improving workflow continuity.

SKILLS

Technical Skills:	Professional & Soft Skills	Languages:
• Programming: C, C#, .NET, ASP.NET Core, React, TypeScript, Node.js, Flutter, Firebase, Python, Java, JavaScript, HTML/CSS, SQL. • Software Engineering: Algorithms, Data Structures, OOP, REST APIs, SignalR, Entity Framework Core, Operating Systems • Data & Analytics: SQL Server, Power BI, Tableau, NumPy, pandas, Excel • Tools & Platforms: Git/GitHub, Visual Studio, VS Code, Inno Setup, Android Studio, Linux/Unix, Figma, Justinmind, Adalo • Security & Protocols: SWIFT (ISO 15022/MT), FIX, Cryptography (AES/HMAC), JWT, IKVM • IT Support: Troubleshooting, Networking basics, Documentation, System Maintenance • AI & Local LLMs: Ollama, LM Studio, llama.cpp/GGUF (K-quants, layer offload), CUDA, GPU/VRAM sizing, PC builds, Hugging Face (Llama/Qwen/Mistral) • AI Engineering: prompt & context engineering, structured/JSON output, tool/function calling, agent harnesses, MCP (Model Context Protocol), Claude Code/Cursor	• Problem Solving & Critical Thinking • Time Management & Organization • Leadership & Teamwork • Communication (Tech & Non-Tech) • Project Coordination & Multitasking • Adaptability & Flexibility • Curiosity & Continuous Learning • Analytical Thinking & Decision-Making • Conflict Resolution & Negotiation • Client & User Support	• Arabic — Native • English — Fluent (C1) • French — Beginner (Delf A1)

LEADERSHIP & VOLUNTEERING

- ACM Treasurer & IT Support — Managed finances and maintained IT systems.
- GDVC IT Support — Provided event support; awarded Best Member (2024).
- Students Deanship Volunteer — Supported campus-wide student initiatives.
- Jubilee Institute — Organized sports day; earned 5th place in Line Robotics.
- Volunteered with MUN, Run Jordan, and other community events.

CERTIFICATIONS & AWARDS

- Google (Coursera): IT Support (2023), Project Management (2023)
- DataCamp: Python, NumPy, pandas, Data Manipulation with pandas
- Award: Best Member — GDVC (2024)
- Top 24 Finalist — Ahli Fintech Hackathon (2025)
- 7th Place — Tech 3arabi Hackathon(2025)

INTERESTS

- Artificial Intelligence & Machine Learning
- Augmented & Virtual Reality (AR/VR)
- Game Development
- Computer Architecture
- Hackathons & Tech Competitions

PROJECTS

MedGuard — Health Vitals Companion (Graduation Project, Prototype) Flutter, Firebase (Auth/Firestore), BLE • Built a mobile app that lets a Care Receiver share vitals (heart rate, SpO₂, stress) with a Carer in real time via Firestore. • Implemented email/password auth with password reset and role-based views (Care Receiver / Carer). • Added optional BLE heart-rate read (GATT 0x180D/0x2A37) and a mock device scan flow. • Built a GPS emergency-alert pipeline that runs AI health analysis (Gemini Cloud Function) and pushes critical alerts to the Carer over FCM, with condition-based first-aid tips. • Structured code with screens/widgets, state via provider; documented setup, permissions, and Firebase rules.	MOT — Gamer Social Network & LFG Matchmaking Flutter, Firebase, Riverpod, RevenueCat • Built a cross-platform app for gamers to find teammates and connect — profiles plus look-for-group matchmaking by game, platform and playstyle. • Implemented real-time 1:1 chat with typing/seen indicators and FCM push notifications. • Integrated a live gaming-news feed and a 300+ game database via the RAWG API. • Added content moderation (toxicity filtering, reporting, age-gating) and Cloud Functions for feed fan-out and notifications. • Shipped premium tiers and an in-app store with RevenueCat; analytics and crash reporting via Firebase.
--	---

PROJECTS (CONTINUED)

Odispear — Discord-style Community Platform (Live · n0tmot.com) | React, TypeScript, Node.js, PostgreSQL, Redis, LiveKit, AWS

- Built a full-stack community platform — servers, channels, roles and direct messages — with real-time messaging over Socket.IO.
- Integrated LiveKit voice/video with RNNoise/Krisp noise filtering, push-to-talk and voice-activity detection.
- Implemented JWT + Google OAuth, Stripe subscription billing, and AWS S3 media on a PostgreSQL (AWS RDS) + Redis backend.
- Deployed to AWS EC2 behind nginx with PM2; tuned CORS and cross-origin image loading. Live at n0tmot.com.

Sehle — On-Demand Local-Services Marketplace | Flutter, BLoC, Supabase, PostGIS, Next.js, Stripe, Tap

- Built customer and provider Flutter apps (BLoC) for booking local services, with live provider GPS tracking and in-app chat.
- Implemented geolocation discovery using PostGIS spatial queries and multi-role access (customer / provider / admin).
- Integrated Stripe and Tap payments via Supabase Edge Functions, plus FCM push notifications and KYC verification.
- Built a Next.js admin dashboard for users, providers, bookings and promotions.

Tabayyun — AI Arabic News & Image-Tampering Verifier | React, Vite, OpenAI, Google GenAI, Sightengine

- Built an Arabic-first web tool that scores news credibility from a URL or text using LLM analysis plus keyword/sentiment heuristics.
- Implemented image forensics — EXIF metadata, Error-Level Analysis and Sightengine AI-generated-image detection.
- Added a trusted-source database and reverse-image-search links; designed a fully right-to-left, animated UI.
- Hackathon project (Tech 3arabi).

Masra — Islamic Education Platform (Flutter app + Node API) | Flutter, Node.js, Express, Prisma, PostgreSQL, Supabase

- Built a Flutter app (offline-first caching, Arabic/English localization) for news, fatwa search, courses and gamified 30-day challenges.
- Developed a Node.js/Express + Prisma API on PostgreSQL (Supabase) with row-level security and a secure points RPC.
- Created a 12-panel admin CMS for managing all content — news, fatwas, courses, challenges and users.
- Set up GitHub Actions CI/CD for linting, builds and automated APK releases.

Sabaq — Quran-Memorization App with AI Audio Grading (Team Project) | React Native, Expo, Django, DRF, PostgreSQL

- Built with a 3-developer team; owned the Django / DRF backend and external integrations.
- Implemented an OAuth2 proxy and MCP integration to the Quran Foundation API for auth and bookmark sync.
- Built AI recitation grading — OpenAI Whisper speech-to-text fuzzy-matched against riwaya-correct text with diff feedback.
- Supported a React Native / Expo client with a gesture-based Mushaf reader and verse-by-verse audio.

FactQuest — Gamified Media-Literacy Trainer | React, Vite, Tailwind CSS

- Built an interactive web app that teaches users to spot misinformation, deepfakes and bias.
- Designed eight challenge modules — deepfake, clickbait, bias, sponsored, satire, image and source verification — with guided lessons.
- Implemented XP, streaks and level progression with an animated mascot for feedback.
- Hackathon project.
